      }
    }
    /* For screens wider than 900px */
    @media (min-width: 900px) {
      body {
        background-color: lightgreen;
      }
    }
  </style>
</head>
<body>
  <h1>Responsive Design with Media Queries</h1>
  <p>This is a simple example of using media queries to change the background color and font size based on screen size.
    Resize the browser window to see the changes!</p>
  <p>At small screen sizes, the background is light coral. On medium screens (600px and above),
    it changes to light blue. For larger screens (900px and above), the background becomes light green.
    Additionally, the font sizes increase for larger screens to enhance readability.</p>
</body>
</html>
